Principal

October 2026

Dear Parents/Carers

RE: Evidence for Learning Family App (EfL)

Evidence for Learning is used throughout school as an assessment tool and to showcase evidence of the learning that pupils undertake; with staff in school capturing photo and video evidence, providing comments and feedback for the learning and linking this to a range of curriculum frameworks. We also use the system to record meaningful evidence documenting progress towards individual EHCP outcomes.

The Evidence for Learning Family App allows adults at home the opportunity to view this evidence and to gain a greater awareness of the learning taking place in school and their young person's progress and achievements; enhancing the communication between home and school. Teachers will be uploading a range of evidence against pupil EHCP outcomes and subject specific learning each term and there is also the opportunity for parents to leave comments against evidence uploaded, however, please note this is not to replace the Home School Contact Book for general comments.

For parents and carers that are new to Meadowfield, you will receive an email from Evidence for Learning with your username to enable you to log in to be able to view, comment on and upload evidence.

We have created user log in details with the email address we have on file at school. If you have not provided an email address or amended your email address on Weduc or have changed your email address, please let us know by contacting the office at office@meadowfield.kent.sch.uk.

The attached document shows how to download the required app, create your password and log in. If you haven't received the email, please check your spam/junk folders. Additionally, if you have any questions or experience difficulty accessing the app or the evidence uploaded, please do not hesitate to contact the class teacher who will be able to help or find the answer for you.

From this September we will be using EfL during PCR's to view your child's progress and ascertain next steps. It would be beneficial if you are already using it to collaborate in developing new targets.

If you have any difficulties with EfL or accessing the system, please contact myself via the class teacher, contact book or office email.

Yours faithfully

Charissa Baldock
Exam & Progress Officer
